AceWell Universal Power Fitting Instructions

APPLICATIONS: Motorcycles and ATV's

Read these instructions completely

Step 1. This fitting details the steps necessary for connecting your new AceWell Universal Power wiring harness.

Step 2. Mount handlebar switch on bars. You may want to mount the switch away from or on the opposite side of the KILL switch in order to prevent any confusion.

Step 3. Loose fit the and route the AceWell harness wiring and connector to the speedometer and plug the two together.

Step 4. The unit is powered by the 9 volt battery which provides a constant feed to maintain all the memory settings of the speedometer

Step 5. Mount the battery in a secure location using a few cable tie wraps. Then once you have everything in position secure the wiring harness.
